財務報告附註

1. 組織結構與重要會計政策

坦伯頓基金公司(Templeton Funds)是依據美國 1940 年投資公司法案(簡稱為 1940 法案)註 冊成立的開放式投資公司,其投資三支個別基金並且採行美國一般公認會計原則(U.S. GAAP)之專業會計和報導指南。每支基金有各自的財務報告,此為**富蘭克林坦伯頓世界基金**(以下稱本基金)之財務報告。本基金提供四種股份類別:A 股、C 股、R6 股及 Advisor 股。C 股在持有 8 年後每月將自動轉為 A 股。各股份類別的首次銷售手續費、遞延銷售手續費、對單一股份具影響之事件的投票權、轉換權益、不同約定之分銷費用及股務代理機構費用皆有所不同。

本基金重要會計政策摘要如下:

a. 財務工具評價

本基金為每日以公平價值(fair value)評價投資的財務工具。公平價值是市場參與者於秩序交易中,賣出資產或轉移負債於衡量日所被買賣參與者接受的價格。在紐約證券交易所(NYSE)開放交易的平常工作日,本基金在紐約證券交易所關閉時(通常東部時間下午四點)計算每股淨資產價值(NAV)。在本基金董事會所核准的政策及程序下,本基金的行政經理公司負責監控及評價的範圍包括:主導具有交叉功能之**評價委員會**(the Valuation Committee (VC))。VC提供由董事會每年所核准基金評價政策及程序的管理及監督。除其他事項外,這些程序允許本基金得以利用獨立定價服務、來自證券和財務工具的交易商所提供的報價及其他市場資訊來決定公平價值。

在證券交易所或那斯達克交易系統掛牌之股票分別以最後公告售價或當日官方收盤價格計價。外國證券是以證券主要交易之外國證券交易所或是東部時間下午四點收盤價估值。其價格將以國外證券依估值當日東部時間下午四點的收盤匯率被轉換成美元後的價值而定。店頭市場交易證券其估值則不超過最近一次的買賣報價範圍。同時在多個市場或多個交易所進行交易的證券,其估值則以最具廣度和代表性之市場的報價為準。某些股權證券是以類似證券的基本特徵或關係為評價基礎。

基金的投資按收盤時的資產淨值估值。投資於定期存款以成本估算價值,其接近市場價格。

特定衍生性金融商品工具在店頭市場交易。本基金使用多方面的技術作為評價服務,包括產業標準選擇模式以及財產折價現金流模型來決定這些工具的公平價值。本基金在衍生性商品契約下的淨收益或債務係計入淨資產並以契約的公平價值評估。

當財務工具缺乏可以信賴或是無法獲得市場價格時,本基金採用一些程序來決定其公平價值。在這些程序下,本基金主要使用市場基礎法(market-based approach),即使用相關或可比較之資產或負債、近期交易、市場乘數、帳面價值及其他相關資訊來決定投資之公平價值。收益基礎衡量法(income-based valuation approach)也可用於投資之預期未來現金流量折價以計算公平價值。由於處分投資的限制的本質或是存續期間,可能也使用折價來計算。由於此類投資評價固有的不確定性,其公平價值與交易市場的價格可能會有顯著的差異。

於外國證券交易所及店頭交易市場掛牌證券的交易,可能早於東部時間下午四點時間。此外,某些外國市場的交易並不會發生在每一個基金的營業日內。有時候,在外國證券交易完畢與東部時間下午四點之間的時間裡發生的事件可能對本基金所持有之投資組合證券價值的可信度造成影響。因此,由外國市場收盤後所決定之基金組合證券價格與東部時間下午四點最近的價格間,可能會產生差異。為了最小化這些潛在的差異,本基金得採用獨立定價服務將投

- 1. 組織結構與重要會計政策(承續前文)
- a. 財務工具評價(承續前文)

資組合證券的價值調整至東部時間下午四點最新指標的公平價值。截至 2023 年 2 月 28 日,部分證券已使用公平價值程序來定價,在這種情況下,這些證券被分類為公平價值衡量層級中的等級 2,稱為"市場層級公平價值"。更多說明,請參閱"公平價值衡量"附註。

當申報期間的最後一日為非營業日時,某些外國市場是在本基金的淨值未被計算時營業,此可能造成基金投資組合證券的價值在申報期間的最後營業日及最後日曆日間所有差異。任何因外國市場開市所造成之顯著證券價值變動將被基金為反映財務申報目的而進行調整和反映。

b. 外幣轉換

投資組合中以外幣結算的證券以及其他資產與負債,是在估值日以這類外幣對美元的匯率轉換成美元來定價。本基金得簽訂外匯契約協助以外幣計價的交易。以外幣結算之證券的申購與銷售,收益與費用項目是以在交易日生效的匯率轉換成美元來定價。以外幣計價之投資組合證券、資產及負債包含這些外幣相對於美元價值下跌的風險。有時候,事件的發生可能影響外幣對美元匯率的可獲得性或可信度。若有此類事件發生,將以本基金董事會所建立並核准之程序來確定該匯率的公平價值。

本基金不會單獨報告由於持有證券的市價變動而引起的外幣匯率變動的結果。這類的變動已包含在經營業績表中的淨實現與未實現投資利得或損失中。

已實現的匯兌利得或損失來自於外幣銷售、在證券的交易日與交割日之間所實現的貨幣利得或損失及股利、利息、外國預扣稅的紀錄金額與其等值美元金額之間的差異。淨未實現匯兌利得或損失來自於在報告期末除所持有的投資證券之外,以外幣結算之資產與負債的外幣匯率變動。

C. 證券借貸

本基金參與一項代理機構基礎之證券借貸計劃以賺取額外的收益。本基金收取相當於所借出證券之公平價值至少 102%的金額之現金及/或美國政府與機構證券擔保品。在此借貸的存續期間內擔保品的金額不低於該借出證券公平價值(在基金各營業日結束時評定)的 100%,任何因證券價值變動而須追加的擔保品必須於次一營業日交付給本基金。與其他基金存入聯合現金帳戶的現金擔保品習慣被投資於富蘭克林顧問公司(本基金之關係企業)所管理的貨幣市場基金裡。本基金收取來自現金擔保品的投資收益,以及從借貸者收取出借費用與回扣。來自借出證券的收益,扣除支付予證券借貸機構以及/或是第三方供應商的費用,已分別記錄於經營業績表中。本基金承擔有關現金擔保品投資與證券借出的市場風險,以及代理機構違反其對本基金義務的風險。如果借貸者違反其應返還借出證券的義務,本基金有權利運用所收取的擔保品於公開市場再買回這些證券。證券借貸機構已同意賠償本基金由第三方借入者產生的違約風險。截至 2023 年 2 月 28 日,本基金無借出證券。

d. 所得稅及遞延稅

按照基金政策,本基金必须符合美國稅務法對於投資公司的規定,對股東分配幾乎所有的應稅收益與淨實現利益以免於繳納聯邦所得稅及特許權稅,因此無需預提美國聯邦所得稅。

本基金在外國管轄區域的投資所收取的收益、證券售出的資本利得以及一些外匯交易可能須繳納外國稅捐。如有外國稅捐,其金額將依據本基金所投資之外國市場實施的稅務法規與稅率申報。如外國對淨實現利得加以課稅,本基金將記錄預估的遞延稅賦義務,其金額相當於當證券在評價日交易須支付的稅額。

- 1. 組織結構與重要會計政策(承續前文)
- d. 所得稅及遞延稅(承續前文)

由於遍及歐盟一些國家的幾個訴訟案件結果,本基金已經為以前在這些國家所賺取股利的代扣稅款申報追加的回收稅款(歐盟回收)。已認可收益,若有的話,這些歐盟回收金額是以其他收益反映於經營業績表中,而任何相關應收款項,若有的話,是以歐盟稅款回收反映於資產負債表中。與這些申報相關的任何費用都反映在經營業績表中的其他費用中。當這些訴訟的最終裁決、取得這些回收稅款的可能性以及付款的可能時間安排尚存有不確定性時,則無金額得以被反映於財務報表中。就美國所得稅目的,基金收到的歐盟稅款回收,若有的話,基金股東能夠在其個人所得稅申報單中用為稅收抵免來減少外國稅額。如果本基金在一個財政年度收到的歐盟回收款項超過本基金支付的外國預扣稅,並且本基金之前已將其轉嫁給其股東的外國稅款用於作為股東收入的抵免或扣除納稅申報表後,本基金將與美國國稅局 (IRS)簽訂結算協議,以代表本基金的股東支付相關的納稅義務。本基金已決定與 IRS 達成一項結算協議,並在經營業績表中將估計費用計為收益的減項。

只有當稅務機關基於稅項的技術優勢進行依據美國一般公認會計原則(U.S.GAAP)審查時認為該不明確稅項低於50%的情況下,本基金才會承認不明確稅項的賦稅利益。於截至2023年2月28日止及所有開放稅賦年度,本基金認為沒有因被要求於納稅申報表所揭有關不明確稅項之納稅申報(或預計在未來進行納稅申報)之未承認賦稅利益而產生的負債。開放稅賦年度為基於稅賦管轄權之法定時效限制下仍須接受審查的年度。

e. 證券交易、投資收益、費用及配息

證券交易是在交易日作入帳。證券交易之已實現利得或損失則決定於特定基礎。利息收入與預估費用則每日計提。利息收入包括債權的折價與溢價攤銷。股利收入是在除息日入帳,除了某些來自外國證券的股利是在本基金接獲除息日通知才立即認定。對股東的配息是在除息日入帳並且依據所得稅法(稅基)確定。以稅基所決定的可分配盈餘可能不同於依照一般美國公認會計準則(U.S.GAAP)所紀錄的盈餘。這些差異可能是永久或是暫時的。永久性差異將產生在資本帳戶被重新分類以反映其稅賦特性。這些重新分類對淨資產或是經營業績並不會造成影響。暫時性差異則不用重新分類,因為差異在後續期間將會迴轉。

本信託所產生的共同費用,將依個別基金的淨資產估本基金的總淨資產的比率來配置到各別基金,某些個別基金單獨產生的費用將直接記錄在招致此費用的基金帳內。

已實現與未實現利得與損失以及淨投資收益(股份等級特定費用除外),是依照個別股份等級的淨資產之相對比重而每日分配到個別股份等級。股份等級的費用差異可能導致各股份等級每股配息款項的差異。

f. 會計估計

管理階層依照美國一般公認的會計準則編制財務報表時需要做出會計估計與假設。這些會計估計與假設會影響於財務報表日的資產與負債金額以及在財務報表期間的收入與費用金額。實際結果可能與估計值不同。

g. 保證及賠償

在本信託的組織文件規定下,本信託同意免除其主管與董事在某些超越其職責範圍而發生的負債責任。此外,在正常業務狀況下,本信託代表本基金與服務提供機構簽訂契約也包含責任免除條款。本信託在這些免責條款下的最大風險是未知的,因為涉及未來可能對本信託發生的被訴訟索賠。目前,本信託預期損失的風險是很小的。

2. 實益權益股份

在截至 2023 年 2 月 28 日,本基金經授權發行無數量管制的股份(無股票面值)。本基金股份的 交易如下表:

SHAREHOLDER LETTER

Dear Shareholder:

During the six months ended February 28, 2023, global equities rose despite continued challenges resulting from elevated inflation and higher interest rates. The price of oil fell, and several other commodities that were disrupted by Russia's invasion of Ukraine stabilized at or near their pre-war prices, easing inflationary pressure. China ended its restrictive zero-COVID policy, prompting investor optimism that a return to normal conditions would benefit global growth. In this environment, global developed and emerging market stocks, as measured by the MSCI All Country World Index-NR (net of tax withholding when dividends are paid), posted a +3.32% total return for the period.¹

We are committed to our long-term perspective and disciplined investment approach as we conduct a rigorous, fundamental analysis of securities with a regular emphasis on investment risk management.

Historically, patient investors have achieved rewarding results by evaluating their goals, diversifying their assets globally and maintaining a disciplined investment program, all hallmarks of the Templeton investment philosophy. We continue to recommend investors consult financial professionals and review their portfolios to design a long-term strategy and portfolio allocation that meet their individual needs, goals and risk tolerance.

Templeton World Fund's semiannual report includes more detail about prevailing conditions and a discussion about investment decisions during the period. Please remember all securities markets fluctuate, as do mutual fund share prices.

We thank you for investing with Franklin Templeton, welcome your questions and comments, and look forward to serving your investment needs in the years ahead.

Sincerely,

Alan Bartlett
Chief Investment Officer

Economic and Market Overview

Global developed and emerging market equities, as measured by the MSCI ACWI-NR, posted a +3.32% total return for the six months ended February 28, 2023.¹ Despite continued challenges from elevated inflation and higher interest rates, stocks gained amid signs of resilience in the global economy. The price of oil fell, and several other commodities that were disrupted by Russia's invasion of Ukraine stabilized at or near their pre-war prices, easing inflationary pressure. China ended its restrictive zero-COVID policy, prompting investor optimism that a return to normal conditions would benefit global growth.

In the U.S., gross domestic product growth resumed in the second half of 2022, rebounding from contractions in the first two quarters of the year. Increasing consumer and government spending, rising inventories and strong nonresidential fixed investment boosted economic growth. Meanwhile, inflation, which remained heightened relative to recent decades, showed signs of easing. The annual inflation rate, as measured by the consumer price index, declined each month from September 2022 through January 2023.

In an effort to control inflation, the U.S. Federal Reserve (Fed) raised the federal funds target rate four times during the period to end at a range of 4.50%–4.75%. The Fed slowed the pace of its interest rate increases from 75 basis points (bps) at its September and November 2022 meetings to 50 bps in December and 25 bps in February 2023. At its February meeting, the Fed noted that although inflation has eased somewhat, it remained elevated, and job growth was robust while the unemployment rate continued to be low. Furthermore, the Fed maintained its policy of reducing its accumulated bond holdings and decreasing the size of its balance sheet.

Economies in the eurozone maintained a slow growth rate in 2022's third and fourth quarters. The European Central Bank continued to raise interest rates during the six-month period, opting to increase its benchmark rate at each of its four meetings to fight growing inflation. While the ongoing war in Ukraine and subsequent sanctions against Russia disrupted the supply of natural gas to Europe, alternate supplies

and reduced industrial consumption helped maintain gas inventories at historically high levels. In this environment, European developed market equities, as measured by the MSCI Europe Index-NR, posted a +17.69% total return for the six months under review.¹

Asian developed and emerging market equities, as measured by the MSCI All Country Asia Index-NR, posted a -0.05% total return for the six-month period.¹ China's economy grew on an annual basis in the third and fourth quarters of 2022. In December 2022, China loosened its strict zero-COVID policy, lifting a potential barrier to continued growth and driving gains in China's equity market. Japan's economy weakened in 2022's third quarter before returning to modest growth in the fourth quarter, driven by rising private consumption amid loosened border controls.

Global emerging market stocks, as measured by the MSCI Emerging Markets Index-NR, posted a -2.29% total return for the six months under review.¹ Concerns that continued strength in the U.S. economy could keep Fed monetary policy tight negatively impacted stocks in developing nations. Stocks in these countries are negatively impacted by high interest rates in the U.S., which increase the yield of some U.S.-based assets, making them relatively more attractive to investors.

Investment Strategy

Our investment strategy employs a bottom-up, valueoriented, long-term approach. We focus on the market price of a company's securities relative to our evaluation of the company's long-term earnings, asset value and cash flow potential. We also consider the company's price/earnings ratio, price/cash flow ratio, profit margins and liquidation value. The Fund may use a variety of equity-related derivatives, which may include equity futures and equity index futures, for various purposes including enhancing Fund returns, increasing liquidity and gaining exposure to particular markets in more efficient or less expensive ways. The Fund also may from time to time engage in currency-related derivatives, such as currency and cross-currency forwards and currency futures contracts, to hedge some of its foreign currency exposure.

Manager's Discussion

In a six-month period characterized by elevated uncertainty and shifting market trends, Templeton World Fund delivered absolute gains and outperformed its benchmark MSCI ACWI-NR by the largest margin in six years. Outperformance during the period was primarily attributable to stock selection, which was encouraging given the volatility in factor trends during the period. In our view, outperformance absent a strong style regime is a good sign as it highlights the portfolio's idiosyncratic return potential and the positive impact of stock selection.

Templeton World Fund's portfolio has a "quality value" bias that favors what we view as reasonably valued companies with strong fundamentals, good competitive positions and attractive growth prospects. We refer to the types of companies that we own as "leaders" because, in our assessment, they are either currently among the best-inclass in their respective business segments or they are moving in that direction over our investment horizon. While we like these companies for their quality characteristics, our long-term horizon and focus on fundamental valuations means that the Fund's holdings often look quite different than those found in a simple quality factor index. To this end, we were particularly pleased to outperform during a period when the global quality factor remained largely out of favor.

Market leadership during the semiannual review period was initially dominated by large-capitalization defensive U.S. value stocks at a time when policy tightening, U.S. dollar strength and slowing economic indicators raised expectations of a global recession. As the period progressed, investors began to focus on early signs that inflation could be peaking. Consequently, entering 2023, rising expectations of a dovish policy pivot from the Fed led to a revival in risk appetite, a pull-back in the U.S. dollar, and a resurgence in international cyclical growth stocks. However, renewed signs of more persistent inflation late in the period led to increased hawkishness from central bankers, causing a rotation out of rate-sensitive emerging market stocks and back into developed market equities, particularly in Europe.

European outperformance was the most consistent market trend during a period otherwise characterized by ongoing leadership rotations. In fact, it was the best six-month period for European equities (relative to the rest of the world) in at least two decades as mild winter weather quelled fears of an energy crisis on the continent and investors gravitated to the region's relatively inexpensive valuations. The Fund's European holdings were the primary regional contributors, led by a favorable overweighted allocation and stock selection in the U.K. Our European overweight also had a meaningfully positive currency impact given the strength of both the British pound and the euro versus the U.S. dollar. Asian holdings also outperformed, led by stock selection and favorable allocations in Hong Kong (overweight) and Japan (underweight). North American holdings were the primary detractors, pressured by stock selection in the U.S. Large-capitalization technology-adjacent stocks in the U.S. were out of favor during the period, and our positions in companies like e-commerce retailer Amazon.com, internet search firm Alphabet, media giant and theme park operator Walt Disney and software developer Microsoft—all of which we consider to be reasonably valued "leaders"—negatively impacted performance.

Of the four aforementioned stocks, only Microsoft is an information technology (IT) sector constituent (Amazon is consumer discretionary, and Alphabet and Disney hail from communication services). Thus, despite the pressure on technology-adjacent stocks, the Fund's IT holdings were actually the top contributors during the period. Stock selection also contributed. Absolute and relative returns

were significantly supported by our avoidance of what we viewed as expensive technology stocks with uncertain paths to profitability, and focused instead on established leaders like German enterprise software firm SAP and a handful of cyclically depressed semiconductor stocks (Germany's Infineon Technologies and U.S.-based Microchip Technology and Applied Materials were all among the top 10 contributors).

Industrials was the other major sector contributor during the period, led by U.K. aerospace and defense firm Rolls-Royce Holdings, which rallied on strong earnings results. The company is in the midst of a strategic review, with new medium-term financial targets expected to be released in the latter half of 2023. Overall, the firm's balance sheet is improving, with positive cash flow dynamics and a healthy industry demand profile. Furthermore, the ongoing recovery in international long-haul travel significantly benefits Rolls-Royce given its long-term service contracts, which tie revenues to engine flight hours. More generally, we increased exposure to cyclicals (like Rolls-Royce) early last year when policy tightening and higher interest rates increased concerns about a possible global recession, creating select opportunities among economically sensitive stocks. We trimmed some of these exposures during the review period as pockets of optimism returned and cyclical stocks were re-rated higher.

Turning to detractors, communication services was the biggest laggard, pressured by the previously mentioned Alphabet and Disney. Shares of Disney were volatile during the period given well-known industry and company challenges, including a leadership rotation that saw the replacement of the firm's beleaguered CEO, Bob Chapek, with former long-time Disney boss Bob Iger. We have been encouraged by Iger's early efforts to communicate a strategy that transitions Disney out of its expensive

5

pursuit of streaming market share and towards a path of greater efficiency. Near-term pressures aside, we believe the changes underway at Disney have the potential to significantly unlock additional value for shareholders. Management plans to significantly cut costs and reinstate the company's dividend by the end of the year. Furthermore, an activist investor remains involved and is likely to keep pressure on management to execute a strategy that we largely support. At current valuations, the stock remains a core portfolio holding.

Financials was the other notable sector laggard during the period, though there were no financials holdings among the Fund's 10 biggest detractors. The Fund's financials holdings delivered high single-digit gains, but were pressured by a significant underweighted allocation to the market-leading sector, which benefited from rising interest rates and earnings expectations. Our exposures to the sector remain highly selective. We've entirely avoided banks in low-returning, over-regulated markets with elevated credit risk, and focused instead on companies in the diversified financials and insurance industries operating in attractive end-markets and featuring unique business models and profit drivers.

At Templeton, we think creatively about the many ways that value gets created over time. The result is a process that combines analytical rigor with a dynamic approach to value that covers a range of different investment profiles. One of the objectives underpinning our use of the full spectrum of value is the independence it creates from the large momentum shifts that so often buffet markets. We seek to build portfolios that will not be whipsawed by the whims of the equity market as investors rotate between narratives. If we can successfully manage the volatility associated with these swings, we can then focus on pursuing alpha over time through stock picking—that is, through the evaluation of long-term business fundamentals and buying shares at a discount to their intrinsic worth. Templeton World Fund is full of companies that we view as attractively valued and high quality with idiosyncratic risk-return characteristics. We believe the portfolio is well positioned to support performance over time, particularly if the market continues to move away from macroeconomic themes and towards a more discriminate assessment of bottom-up value.

Thank you for your continued participation in Templeton World Fund. We look forward to serving your future investment needs.

All investments involve risks, including possible loss of principal. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments; investments in developing markets involve heightened risks related to the same factors. Currency rates may fluctuate significantly over short periods of time, and can reduce returns. Because the Fund may invest its assets in companies in a specific region, including Europe, it is subject to greater risks of adverse developments in that region and/or the surrounding regions than a fund that is more broadly diversified geographically. Derivatives, including currency management strategies, involve costs and can create economic leverage in the portfolio which may result in significant volatility and cause the Fund to participate in losses (as well as enable gains) on an amount that exceeds the Fund's initial investment. The Fund may not achieve the anticipated benefits, and may realize losses when a counterparty fails to perform as promised. Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund's prospectus also includes a description of the main investment risks.

Russia's military invasion of Ukraine in February 2022, the resulting responses by the United States and other countries, and the potential for wider conflict could increase volatility and uncertainty in the financial markets and adversely affect regional and global economies. The United States and other countries have imposed broad-ranging economic sanctions on Russia and certain Russian individuals, banking entities and corporations as a response to its invasion of Ukraine. The United States and other countries have also imposed economic sanctions on Belarus and may impose sanctions on other countries that support Russia's military invasion. These sanctions, as well as any other economic consequences related to the invasion, such as additional sanctions, boycotts or changes in consumer or purchaser preferences or cyberattacks on governments, companies or individuals, may further decrease the value and liquidity of certain Russian securities and securities of issuers in other countries that are subject to economic sanctions related to the invasion.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Cumulative total return represents the change in value of an investment over the periods indicated.
- 3. Average annual total return represents the average annual change in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 4. Prior to 9/10/18 these shares were offered at a higher initial sales charge of 5.75%, thus actual returns (with sales charges) would have differed. Average annual total returns (with sales charges) have been restated to reflect the current maximum initial sales charge of 5.50%.
- 5. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report. In periods of market volatility, assets may decline significantly, causing total annual Fund operating expenses to become higher than the figures shown. See www.franklintempletondatasources.com for additional data provider information.

Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including sales charges (loads) on Fund purchases and redemptions; and (2) ongoing Fund costs, including management fees, distribution and service (12b-1) fees, and other Fund expenses. All mutual funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other mutual funds. The table assumes a \$1,000 investment held for the six months indicated.

Actual Fund Expenses

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value" for each class of shares. You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by 1,000 (if your account had an 8,600 value, then $8,600 \div 1,000 = 8.6$). Then multiply the result by the number in the row for your class of shares under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were 7.50, then $8.6 \times 7.50 = 64.50$). In this illustration, the actual expenses paid this period are 64.50.

Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example for the class of shares you hold with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

Notes to Financial Statements (unaudited)

Templeton World Fund

1. Organization and Significant Accounting Policies

Templeton Funds (Trust) is registered under the Investment Company Act of 1940 (1940 Act) as an open-end management investment company, consisting of three separate funds. The Trust follows the accounting and reporting guidance in Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946. Financial Services - Investment Companies (ASC 946) and applies the specialized accounting and reporting guidance in U.S. Generally Accepted Accounting Principles (U.S. GAAP), including, but not limited to, ASC 946. Templeton World Fund (Fund) is included in this report. The Fund offers four classes of shares: Class A, Class C, Class R6 and Advisor Class. Class C shares automatically convert to Class A shares on a monthly basis, after they have been held for 8 years. Each class of shares may differ by its initial sales load, contingent deferred sales charges, voting rights on matters affecting a single class, its exchange privilege and fees due to differing arrangements for distribution and transfer agent fees.

The following summarizes the Fund's significant accounting policies.

a. Financial Instrument Valuation

The Fund's investments in financial instruments are carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Fund calculates the net asset value (NAV) per share each business day as of 4 p.m. Eastern time or the regularly scheduled close of the New York Stock Exchange (NYSE), whichever is earlier. Under compliance policies and procedures approved by the Trust's Board of Trustees (the Board), the Board has designated the Fund's investment manager as the valuation designee and has responsibility for oversight of valuation. The investment manager is assisted by the Fund's administrator in performing this responsibility, including leading the crossfunctional Valuation Committee (VC). The Fund may utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Equity securities listed on an exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Foreign equity securities are valued as of the close of trading

20

on the foreign stock exchange on which the security is primarily traded, or as of 4 p.m. Eastern time. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at 4 p.m. Eastern time on the day that the value of the security is determined. Over-the-counter (OTC) securities are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Certain equity securities are valued based upon fundamental characteristics or relationships to similar securities.

Investments in open-end mutual funds are valued at the closing NAV. Investments in time deposits are valued at cost, which approximates fair value.

The Fund has procedures to determine the fair value of financial instruments for which market prices are not reliable or readily available. Under these procedures, the Fund primarily employs a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed.

Trading in securities on foreign securities stock exchanges and OTC markets may be completed before 4 p.m. Eastern time. In addition, trading in certain foreign markets may not take place on every Fund's business day. Events can occur between the time at which trading in a foreign security is completed and 4 p.m. Eastern time that might call into question the reliability of the value of a portfolio security held by the Fund. As a result, differences may arise between the value of the Fund's portfolio securities as determined at the foreign market close and the latest indications of value at 4 p.m. Eastern time. In order to minimize the potential for these differences, an independent pricing service may be used to adjust the value of the Fund's portfolio securities to the latest indications of fair value at 4 p.m. Eastern time. At February 28, 2023, certain securities may have been fair valued using these procedures, in which case the securities

were categorized as Level 2 within the fair value hierarchy (referred to as "market level fair value"). See the Fair Value Measurements note for more information.

When the last day of the reporting period is a non-business day, certain foreign markets may be open on those days that the Fund's NAV is not calculated, which could result in differences between the value of the Fund's portfolio securities on the last business day and the last calendar day of the reporting period. Any security valuation changes due to an open foreign market are adjusted and reflected by the Fund for financial reporting purposes.

b. Foreign Currency Translation

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Fund may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Portfolio securities and assets and liabilities denominated in foreign currencies contain risks that those currencies will decline in value relative to the U.S. dollar. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Board.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments in the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains

and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

c. Securities Lending

The Fund participates in an agency based securities lending program to earn additional income. The Fund receives collateral in the form of cash and/or U.S. Government and Agency securities against the loaned securities in an amount equal to at least 102% of the fair value of the loaned securities. Collateral is maintained over the life of the loan in an amount not less than 100% of the fair value of loaned securities, as determined at the close of Fund business each day; any additional collateral required due to changes in security values is delivered to the Fund on the next business day. Any cash collateral received is deposited into a joint cash account with other funds and is used to invest in a money market fund managed by Franklin Advisers, Inc., an affiliate of the Fund. The Fund may receive income from the investment of cash collateral, in addition to lending fees and rebates paid by the borrower. Income from securities loaned, net of fees paid to the securities lending agent and/ or third-party vendor, is reported separately in the Statement of Operations. The Fund bears the market risk with respect to any cash collateral investment, securities loaned, and the risk that the agent may default on its obligations to the Fund. If the borrower defaults on its obligation to return the securities loaned, the Fund has the right to repurchase the securities in the open market using the collateral received. The securities lending agent has agreed to indemnify the Fund in the event of default by a third party borrower. At February 28, 2023, the Fund had no securities on loan.

d. Income and Deferred Taxes

It is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code. The Fund intends to distribute to shareholders substantially all of its taxable income and net realized gains to relieve it from federal income and excise taxes. As a result, no provision for U.S. federal income taxes is required.

The Fund may be subject to foreign taxation related to income received, capital gains on the sale of securities and certain foreign currency transactions in the foreign jurisdictions in which it invests. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests. When a

1. Organization and Significant Accounting Policies (continued)

d. Income and Deferred Taxes (continued)

capital gain tax is determined to apply, the Fund records an estimated deferred tax liability in an amount that would be payable if the securities were disposed of on the valuation date.

As a result of several court cases, in certain countries across the European Union, the Fund filed additional tax reclaims for previously withheld taxes on dividends earned in those countries (EU reclaims). Income recognized, if any, for EU reclaims is reflected as other income in the Statement of Operations and any related receivable, if any, is reflected as European Union tax reclaims in the Statement of Assets and Liabilities. Any fees associated with these filings are reflected in other expenses in the Statement of Operations. When uncertainty exists as to the ultimate resolution of these proceedings, the likelihood of receipt of these EU reclaims, and the potential timing of payment, no amounts are reflected in the financial statements. For U.S. income tax purposes, EU reclaims received by the Fund, if any, reduce the amount of foreign taxes Fund shareholders can use as tax deductions or credits on their income tax returns. In the event that EU reclaims received by the Fund during a fiscal year exceed foreign withholding taxes paid by the Fund, and the Fund previously passed through to its shareholders foreign taxes incurred by the Fund to be used as a credit or deduction on a shareholder's income tax return, the Fund will enter into a closing agreement with the Internal Revenue Service (IRS) in order to pay the associated tax liability on behalf of the Fund's shareholders. The Fund determined to enter into a closing agreement with the IRS and recorded the estimated payments as a reduction to income, as reflected in the Statement of Operations.

The Fund may recognize an income tax liability related to its uncertain tax positions under U.S. GAAP when the uncertain tax position has a less than 50% probability that it will be sustained upon examination by the tax authorities based on its technical merits. As of February 28, 2023, the Fund has determined that no tax liability is required in its financial statements related to uncertain tax positions for any open tax years (or expected to be taken in future tax years). Open tax years are those that remain subject to examination and are based on the statute of limitations in each jurisdiction in which the Fund invests.

e. Security Transactions, Investment Income, Expenses and Distributions

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Dividend income is recorded on the ex-dividend date except for certain dividends from securities where the dividend rate is not available. In such cases, the dividend is recorded as soon as the information is received by the Fund. Distributions to shareholders are recorded on the ex-dividend date. Distributable earnings are determined according to income tax regulations (tax basis) and may differ from earnings recorded in accordance with U.S. GAAP. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Common expenses incurred by the Trust are allocated among the Funds based on the ratio of net assets of each Fund to the combined net assets of the Trust or based on the ratio of number of shareholders of each Fund to the combined number of shareholders of the Trust. Certain Fund specific expenses are charged directly to the Fund that incurred the expense.

Realized and unrealized gains and losses and net investment income, excluding class specific expenses, are allocated daily to each class of shares based upon the relative proportion of net assets of each class. Differences in per share distributions by class are generally due to differences in class specific expenses.

f. Accounting Estimates

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

g. Guarantees and Indemnifications

Under the Trust's organizational documents, its officers and trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust.

1. Organization and Significant Accounting Policies (continued)

g. Guarantees and Indemnifications (continued)

Additionally, in the normal course of business, the Trust, on behalf of the Fund, enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is

unknown as this would involve future claims that may be made against the Trust that have not yet occurred. Currently, the Trust expects the risk of loss to be remote.

2. Shares of Beneficial Interest

At February 28, 2023, there were an unlimited number of shares authorized (without par value). Transactions in the Fund's shares were as follows:

c. Distribution Fees

24

The Board has adopted distribution plans for each share class, with the exception of Class R6 and Advisor Class shares, pursuant to Rule 12b-1 under the 1940 Act. Under the Fund's Class A reimbursement distribution plan, the Fund reimburses Distributors for costs incurred in connection with the servicing, sale and distribution of the Fund's shares up to the maximum annual plan rate. Under the Class A reimbursement distribution plan, costs exceeding the maximum for the current plan year cannot be reimbursed in subsequent periods. In addition, under the Fund's Class C compensation distribution plan, the Fund pays Distributors for costs incurred in connection with the servicing, sale and distribution of the Fund's shares up to the maximum annual plan rate. The plan year, for purposes of monitoring compliance with the maximum annual plan rates, is February 1 through January 31.

Class A	0.25%
Class C	1.00%

3. Transactions with Affiliates (continued)

d. Sales Charges/Underwriting Agreements

Front-end sales charges and contingent deferred sales charges (CDSC) do not represent expenses of the Fund. These charges are deducted from the proceeds of sales of Fund shares prior to investment or from redemption proceeds prior to remittance, as applicable. Distributors has advised the Fund of the following commission transactions related to the sales and redemptions of the Fund's shares for the period:

Sales charges retained net of commissions paid to unaffiliated brokers/dealers	\$9,390
CDSC retained	\$511

e. Transfer Agent Fees

Each class of shares pays transfer agent fees to Investor Services for its performance of shareholder servicing obligations. Effective October 1, 2022, the fees are based on an annualized asset based fee of 0.016% plus a reduced transaction based fee. Prior to October 1, 2022, the fees were based on an annualized asset based fee of 0.02% plus a transaction based fee. In addition, each class reimburses Investor Services for out of pocket expenses incurred and, except for Class R6, reimburses shareholder servicing fees paid to third parties. These fees are allocated daily based upon their relative proportion of such classes' aggregate net assets. Class R6 pays Investor Services transfer agent fees specific to that class.

For the period ended February 28, 2023, the Fund paid transfer agent fees of \$857,432, of which \$441,764 was retained by Investor Services.

f. Investments in Affiliated Management Investment Companies

The Fund invests in one or more affiliated management investment companies. As defined in the 1940 Act, an investment is deemed to be a "Controlled Affiliate" of a fund when a fund owns, either directly or indirectly, 25% or more of the affiliated fund's outstanding shares or has the power to exercise control over management or policies of such fund. The Fund does not invest for purposes of exercising a controlling influence over the management or policies. Management fees paid by the Fund are waived on assets invested in the affiliated management investment companies, as noted in the Statement of Operations, in an amount not to exceed the management and administrative fees paid directly or indirectly by each affiliate. During the period ended February 28, 2023, the Fund held investments in affiliated management investment companies as follows:

	Value at Beginning of Period	Purchases	Sales	Realized Gain (Loss)	Net Change in Unrealized Appreciation (Depreciation)	Value at End of Period	Number of Shares Held at End of Period	Investment Income
Templeton World Fund Non-Controlled Affiliates								
							-	Income from securities loaned
Institutional Fiduciary Trust - Money Market Portfolio, 4.204%	\$—	\$707,451	\$(707,451)	\$—	\$—	\$—	_	\$108
Total Affiliated Securities	\$—	\$707,451	\$(707,451)	\$—	\$—	\$—	_	\$108

g. Waiver and Expense Reimbursements

Investor Services has contractually agreed in advance to waive or limit its fees so that the Class R6 transfer agent fees do not exceed 0.03% based on the average net assets of the class until December 31, 2023.

4. Income Taxes

For tax purposes, capital losses may be carried over to offset future capital gains.

At August 31, 2022, the capital loss carryforwards were as follows:

Capital loss carryforwards not subject to expiration:

At February 28, 2023, the cost of investments and net unrealized appreciation (depreciation) for income tax purposes were as follows:

Cost of investments	\$2,322,914,557
Unrealized appreciation.	\$214,120,588
Unrealized depreciation	(255,704,000)
Net unrealized appreciation (depreciation)	\$(41,583,412)

Differences between income and/or capital gains as determined on a book basis and a tax basis are primarily due to differing treatments of foreign currency transactions, EU reclaims and corporate actions.

5. Investment Transactions

Purchases and sales of investments (excluding short term securities) for the period ended February 28, 2023, aggregated \$504,392,466 and \$725,208,719, respectively.

6. Concentration of Risk

Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local, regional and global economic, political and social conditions, which may result in greater market volatility. Political and financial uncertainty in many foreign regions may increase market volatility and the economic risk of investing in foreign securities. In addition, certain foreign securities may not be as liquid as U.S. securities.

7. Geopolitical Risk

26

On February 24, 2022, Russia engaged in military actions in the sovereign territory of Ukraine. The current political and financial uncertainty surrounding Russia and Ukraine may increase market volatility and the economic risk of investing in securities in these countries and may also cause uncertainty for the global economy and broader financial markets. The ultimate fallout and long-term impact from these events are not known. The Fund will continue to assess the impact on valuations and liquidity and will take any potential actions needed in accordance with procedures approved by the Board.

8. Novel Coronavirus Pandemic

The global outbreak of the novel coronavirus disease, known as COVID-19, has caused adverse effects on many companies, sectors, nations, regions and the markets in general, and may continue for an unpredictable duration. The effects of this pandemic may materially impact the value and performance of the Fund, its ability to buy and sell fund investments at appropriate valuations and its ability to achieve its investment objectives.

9. Credit Facility

The Fund, together with other U.S. registered and foreign investment funds (collectively, Borrowers), managed by Franklin Templeton, are borrowers in a joint syndicated senior unsecured credit facility totaling \$2.675 billion (Global Credit Facility) which matures on February 2, 2024. This Global Credit Facility provides a source of funds to the Borrowers for temporary and emergency purposes, including the ability to meet future unanticipated or unusually large redemption requests.

Under the terms of the Global Credit Facility, the Fund shall, in addition to interest charged on any borrowings made by the Fund and other costs incurred by the Fund, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee of 0.15% based upon the unused portion of the Global Credit Facility. These fees are reflected in other expenses in the Statement of Operations. During the period ended February 28, 2023, the Fund did not use the Global Credit Facility.

10. Fair Value Measurements

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's financial instruments and are summarized in the following fair value hierarchy:

- Level 1 quoted prices in active markets for identical financial instruments
- Level 2 other significant observable inputs (including quoted prices for similar financial instruments, interest rates, prepayment speed, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of financial instruments)

The input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level.

A summary of inputs used as of February 28, 2023, in valuing the Fund's assets and liabilities carried at fair value, is as follows:

	Level 1	Level 2	Level 3	Total

elncludes foreign securities valued at \$865,562,754, which were categorized as Level 2 as a result of the application of market level fair value procedures. See the Financial Instrument Valuation note for more information.

11. New Accounting Pronouncements

In June 2022, the FASB issued Accounting Standards Update (ASU) No. 2022-03, Fair Value Measurement (Topic 820) – Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions. The amendments in the ASU clarify that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, should not be considered in measuring fair value. The ASU is effective for interim and annual reporting periods beginning after December 15, 2023, with the option of early adoption. Management has reviewed the requirements and believes that the adoption of the ASU will not have a material impact on the financial statements.

12. Subsequent Events

28

The Fund has evaluated subsequent events through the issuance of the financial statements and determined that no events have occurred that require disclosure.
